

Network IT Engineer

About American Reliance Inc.

With over two decades of experience, American Reliance Inc. (AMREL) has acquired novel technologies to capture the emerging markets of rugged computers, electronic test equipment, medical equipment, and solar energy. Positioned for tremendous growth over the next three years, AMREL expects to become a public company by 2013. This is a rare opportunity for entrepreneurial-spirited individuals who are enthusiastic about diverse emerging industries. Your total commitment will result in generous rewards from the overall success of the company.

The Position

Based out of El Monte, California, AMREL is seeking a Network IT engineer with a strong work ethic and a get-it-done attitude. We are looking for an ambitious, motivated, and energetic individual who can apply their extensive networking/IT skillset to our Computer division.

Responsibilities:

- Develop, set-up and test wireless networking based on the AMREL Operator Control Unit (OCU).
- Work with a designated communication line of products that is customized for mobile computing platforms.
- Provide engineering support/training to Sales and customers for customized communication solutions.
- Travel with Sales to visit integrators/customers and evaluate their application needs.
- Test and troubleshoot networking solutions based on network processor boards.
- Respond to RFIs and RFPs per Sales requests.
- Write SOWs.
- Train Production and Tech Support teams on networking technologies; set up testing procedures.
- Assist QA department and Production in troubleshooting and failure analysis on networking issues; provide corrective actions.

Requirements:

- Minimum 6 years experience with networks, networking products and wireless networks.

- Able to configure systems based on understanding of technical SOWs and communication software.
- Strong written and verbal communication skills.
- Self motivated and able to work in a team.
- Read, write and speak English fluently.
