

# NOW YOU'RE IN **CONTROL**

## THE INDUSTRY'S FASTEST PROTOTYPES. EVEN FASTER MANUFACTURING.

Customized Rugged Computing for Your Robotics

AMREL has been designing and manufacturing mobile computing solutions for over 20 years. But what we're really proud of is our ability to take your impossible specifications and have a fully functioning prototype for delivery, within your mission critical time constraints. Yes, we can do that.

We believe you should never struggle with peripheral devices in the field when AMREL has the expertise and engineers to put it all inside a single solution. With all the rigid standards the warfighter requires, we are especially equipped for integrating and controlling unmanned platforms. Our battle proven laptops and PDA's are designed to exceed MIL-STD 461, MIL-STD 810F and IP54/IP65.

*We customize solutions.*

# CHOOSE YOUR WEAPON

## BATTLE PROVEN

When you need military computers that are built tough inside and out, AMREL is the clear choice. Our computers are housed in a durable magnesium case with individual isolation chambers and sealed ports. We offer an extremely flexible form factor which includes: rugged notebooks, tablets, and PDAs.

Whether conducting EOD operations, carrying out IED detection, manning a checkpoint, surveillance, or dismounted patrol, AMREL has the solutions to keep you in control, no matter where the mission takes you.

AMREL has the perfect arsenal for you!

## AMREL MILITARY COMPUTER ADVANTAGES

Fully rugged military computers - designed to withstand the harshest environmental conditions.

Outstanding technical support - AMREL makes a long term commitment to support customers.

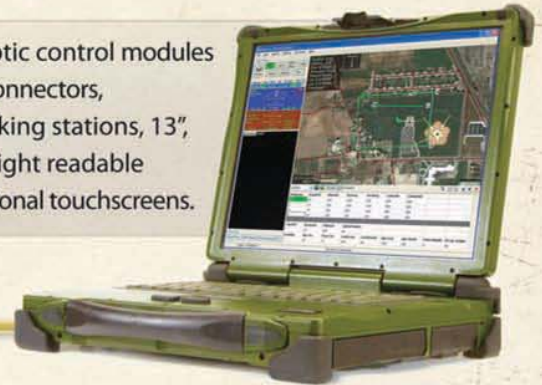

Customizable COTS - AMREL can create innovative customized military computer solutions to meet even the most demanding specifications.

Our proprietary swappable RCM lets you customize your Amrel computers to create a rugged wireless solution with fewer peripheral devices.

## LAPTOPS

Swappable robotic control modules (RCM), military connectors, customized docking stations, 13", 15" and 17" sunlight readable displays and optional touchscreens.

## PDA's

It's a phone, radio, GPS, remote control device and computer with exceptional sunlight readability.

## TABLETS

Military connectors, customized docking station, 8.4" and 12.1" resistive touchscreen sunlight readable displays and programmable function keys.
